

## How To Edit an Existing User Account/Profile

To edit an existing User Account/Profile you will need to login to your account via <http://www.nmstemconnection.org/user>. Once you have successfully logged into your user account you will then see a toolbar located on the very top of the site. On the right side of the toolbar you should see your name. To access your User Profile simply click on your name. This toolbar can be accessed from any page on the site while you are logged in.

Once you click on your name, you will be taken to your user profile. You will then see an 'Edit' tab above your name.

Once you click on 'Edit' you will be taken to a screen that will allow you to make changes to the fields for your User Account. Once you are satisfied with your changes, you will need to scroll to the bottom of the page and click 'Save'.
